Substance Use Disorder Treatment and Prevention Services Service and Program Types

Acute Treatment Services/24-Hour Diversionary Withdrawal Management: (ASAM Level 3.7)
Medical intervention and stabilization for individuals who require withdrawal management in a 24-hour medically monitored environment.

Clinical Stabilization Service: (ASAM Level 3.5)
Clinically managed high intensity short-term residential program for individuals not in need of withdrawal stabilization but require clinical services to stabilize and prepare for the next step in treatment. People can be referred by ATS or from the community if medically stable.

Transitional Support Service: (ASAM Level 3.1)
Short-term residential, support services for adults who need a safe and structured environment to support their recovery process after completing withdrawal management and stabilization. These programs are designed to help those who need services between acute treatment and residential rehabilitation, outpatient or other aftercare. Average length of stay is 4-6 weeks.

Residential Rehabilitation Service (RRS): (ASAM 3.1)
A treatment service for men and women, eighteen years of age and older, who are in the early stages of substance use recovery. These programs provide a structured and comprehensive rehabilitative environment that supports each resident's independence, resilience and recovery from alcohol, opiates, and/or other drugs. Scheduled, goal-oriented rehabilitative services are provided in conjunction with ongoing support and assistance for developing and maintaining skills necessary to maintain recovery. The average length of stay is 90 days. Some programs are able to serve pregnant and postpartum women with their infants.

Co-Occurring Enhanced/Residential Rehabilitation Services (RRS/COE): (ASAM 3.1)
These programs provide an individualized, structured and trauma-informed rehabilitative environment that supports each resident's independence, resilience and recovery. This setting is for individuals who have both a moderate to severe mental health disorder and a substance use disorder. There are also beds for perinatal women as well as youth and young adults.

Family Residential Treatment: (ASAM 3.1)
Family Residential Treatment programs provide a safe and supportive treatment environment for parents and their children when the caretaking parent(s) has a substance use disorder. Programs provide coordinated treatment for parents and children, where children's needs are assessed and supported and parents are provided parenting support, case management, discharge planning for smooth transitions to the community. Families can be of varying sizes with children up to age 18. One program in the state is available for fathers/parenting couples and children.

Pregnant/parenting/family programs can be accessed by calling IHR at 866-705-2807

Day Treatment/Intensive Outpatient Program: (ASAM 2.1 and 2.5)
Day treatment provides each person with 3.5 hours of programming, five times per week; individual, group and family counseling, relapse prevention, communicable disease prevention, case management, and encouragement of the use of community supports.

Outpatient Counseling: (ASAM 1.0)
Assessment, counseling and follow-up for individuals and families experiencing problems with alcohol and other drugs. Individual, group, and family services, and psycho-educational groups may be offered.

Recovery Support Services: (ASAM 1.0)

Recovery support services include recovery coaching, recovery navigation, and case management services. Recovery Coaches have lived experience with substance use disorder. They engage, educate, and support an individual in their unique recovery path. Recovery Coaches are available through the outpatient level of care as well as some other services such as Emergency Departments and courts.

Mass Impaired Driver Education: (ASAM 0.5)

Education for individuals convicted of first offense of driving under the influence of alcohol or other drugs. Comprehensive assessment, 16 interactive group sessions, introduction to recovery supports and referral for treatment as needed.

Second Offender Aftercare: (ASAM 1.0)

Full year of court mandated assessment and counseling for individuals convicted of second offense of driving under the influence of alcohol and other drugs. This service follows a 2-week inpatient program.

Compulsive Gambling: (ASAM 1.0)

Provides information, referral and outpatient counseling for the treatment of compulsive gambling.

Home-based Family Support: First Steps Together

Home visiting program that offers community based and/or virtual services, delivered by a parent in recovery with training to support both recovery and parenting journeys. Groups, care coordination, and the option of working with a mental health counselor are offered. Parents may qualify if you are expecting a child or are a parent of at least one child 5 years old or younger (even if they don't live with you) AND you have ever used opioids and/or stimulants.

Office-Based Opioid Treatment Program (OBOT):

Buprenorphine treatment within a community or behavioral health center setting or medical office.

Opioid Treatment Programs (OTP):

Methadone maintenance and outpatient withdrawal management for individuals with opioid use disorder.

Housing Support and Stabilization (HSS):

Housing Support and Stabilization programs provide case management services within a recovery living environment that establishes community-based supports to maintain ongoing goals in the recovery process. HSS may be permanent or transitional. These case management and recovery support services will assist and support residents to address primary health concerns, as well as develop skills and abilities to sustain recovery, and continue to establish independence.

Overdose Education and Naloxone Distribution:

These programs train individuals who are likely to experience or witness an overdose due to using opioids themselves or living with someone who does. Training covers how to prevent and recognize an opioid overdose, what to do if one occurs, the importance of calling 911, how to perform rescue breathing, and how to administer Narcan.

Peer Recovery Support Center:

The Massachusetts Peer Recovery Support Centers (PRSC) are free accessible peer-led spaces that provide individuals in all stages of recovery from substance use, as well as families and loved ones affected by addiction, the opportunity to both offer and receive support in their community environment. The PRSCs are warm, welcoming spaces grounded in the values and principles of

Recovery and reflective of Multiple Pathways. They are permeated with a sense of hope, belonging and empowerment, with programming based on national standards and best practices in providing peer recovery support services and reflective of peer choice

Access to Recovery (ATR) A 6-month program for individuals who have an opioid use disorder (OUD), and who are seeking support with their recovery. The ATR program provides assistance with basic needs and with employment and career services. ATR works to build recovery systems of care in four cities (Greater Boston, Greater Springfield, New Bedford and Worcester).

Recovery High Schools are public high schools for youth ages 14-21 that provide educational environments suited to support youth recovering from SUD. They serve 30-50 students per school and are supported through blended funding from the Commonwealth, local school districts, and educational collaboratives. The model offers a unique opportunity for students to receive support for their recovery within an academic setting consistent with Massachusetts State Standards. Students with a diagnosed SUD can attend a recovery high school by choice as a referral from a student's sending district is not required.

Family Supportive Housing provides supportive case management and family-centered recovery programming for families of various sizes. Families can stay in these programs for up to two years which provides families with a stable base. **Pregnant/parenting/family programs can be accessed by calling 866-705-2807.**

Intervention Programs:

Programs that provide services to families where addiction may be a problem for one or more family members. These services teach families strategies for engaging those using substances into treatment, strategies for building healthy communication to prevent substance use problems and parenting tools to help parents reduce the chances of substance abuse among their children.

Prevention Services:

Prevention Programs and Community Coalitions offer primary prevention services and opportunities to increase the protective factors in the lives of youth at risk for substance use and decrease their risk of health problems. Evidenced-based curricula are used for youth programming and environmental strategies are used within community coalitions.

If you have a complaint about a BSAS funded or licensed treatment program, you may call the BSAS Complaint Line: 617-624-5171

All Pregnant Women seeking substance use disorder treatment have priority access to treatment in Massachusetts. If you need further assistance in accessing services for pregnant women, please call the *Institute for Health and Recovery* at 617-661-3991 or 866-705-2807
